

# ACTIONS IMPLEMENTATION TABLE

 <b>1. Ensuring the long-term sustainability of fish stocks and habitats</b>	2021-2022	2022-2023	2023-2024	2024-2025	2025-2026	Ongoing
Launch Flathead for the Future program						
Develop harvest plans for priority species						
Identify pathways to transition away from the use of recreational gillnets.						
Review the use of recreational gears and methods						
Upgrade recreational fisheries data collection						
Research climate change implications for recreational fisheries						
Establish a code of practice for wildlife interactions						
Identify marine habitats requiring protection or rehabilitation						
 <b>2. Promoting responsible recreational fishing</b>	2021-2022	2022-2023	2023-2024	2024-2025	2025-2026	Ongoing
Build a new website for recreational and commercial fishing						
Streamline the printed Recreational Sea Fishing Guide						
Upgrade the Tasmanian Sea Fishing Guide App						
Publish information on fisheries ecology, management and impacts						
Produce podcasts and videos on responsible fishing, fisheries management and fisheries science						
Refresh the Fishcare program to better engage priority audiences						
Engage partners to share messages with the fishing public						
Partner with CaLD fisher representatives and employers						
Update and promote the Recreational Marine Fishing Tasmanian Code of Conduct.						
Assess the effectiveness of fisheries enforcement and education						
Initiate partnerships to assess new ways to engage fishers						
Publish the objectives of proposed management changes and predicted impacts on stock health						
Promote fisher awareness in reducing fishing debris						
 <b>3. Involving the community in fisheries management</b>	2021-2022	2022-2023	2023-2024	2024-2025	2025-2026	Ongoing
Conduct annual Fishing Forums						
Engage fishers at public events						
Review RecFAC structures and processes						
Review and improve processes for providing public fisheries management advice						
Work with partners to involve fishers in collecting data, restoring habitats and managing pests						
Work with NGOs to make it easier for people to participate in marine stewardship projects						
Promote citizen science and stewardship projects						
Investigate fishers nominating partial fees for specific activities						

	4. Valuing recreational sea fishing	2021-2022	2022-2023	2023-2024	2024-2025	2025-2026	Ongoing
	Develop an overarching fisheries resource sharing policy						
	Develop resource sharing arrangements that include (a) recreational only fishing areas and (b) allocation arrangements for priority species.						
	Include recreational fishing performance measures in harvest plans						
	Conduct a statewide socioeconomic study of recreational fishing						
	In the LMRMA review, emphasise the importance of recreational fishing and update recreational fisheries management processes to reflect Strategy principles						
	Monitor developments shaping the future of recreational fishing						
	Promote the importance and benefits of recreational fishing						
	5. Making it easier for people to go fishing	2021-2022	2022-2023	2023-2024	2024-2025	2025-2026	Ongoing
	Hold a stakeholder workshop to identify participation barriers and fishing access needs						
	Draft a 'No Barriers' policy						
	Establish a female fishing network						
	Sponsor a 'buddy style' program for mobility impaired fishers						
	Complete an audit of recreational shore-based fishing infrastructure						
	Operate a Recreational Sea Fishing Infrastructure fund and program with an emphasis on shore-based fishing.						
	Conduct a study on artificial reefs and FADs to better understand their impacts and value						
	Develop a fishing code of practice for FADs and artificial reefs						
	Review rock lobster and scallop fishing rules to enable catch sharing						
	Develop Fishcare programs targeting young people, women and girls and mobility impaired persons						
	6. Improving capacity to support recreational fishing	2021-2022	2022-2023	2023-2024	2024-2025	2025-2026	Ongoing
	Consult with fishers on options to improve recreational fisheries management						
	Improve service delivery to inland and marine fishers by collaborating with IFS, MAST and Tasmania Police						
	Develop educational partnerships with the IFS and MAST						
	Partner with TARFish and IMAS to deliver Strategy actions						
	Establish a recreational fishing stakeholder service provider committee						
	Identify co-investment opportunities with other agencies and partners						
	Partner with fishing sponsors and philanthropic organisations						
	Increase staff capacity to progress Strategy priorities and emerging management issues
